

Rious Janowski

Activation Date	Sample Received	Test Complete	Test Kit Code	Test Type
04/05/2020	04/09/2020	04/12/2020	A9E-D97	Dog Stool Level 1

Veterinarian Approved

ClueJay™ Veterinary Lab Tests From Home by Maranda™ are professional pet health tests performed by veterinarians. ClueJay Stool Tests LEVEL 1 (Fecal Ova & Parasite (O&P) by Centrifugation and Microscopy) and LEVEL 2 (adds Giardia Cyst Antigen by ELISA) are performed at Maranda Veterinary Laboratories (MVL) in Denver, CO. LEVEL 3 adds PCR for disease-causing intestinal microbes (bacteria, viruses, protozoa). MVL delivers ClueJay reference lab results directly to pet owners. Veterinarians with sample processing questions are encouraged to contact Maranda LLC at hello@maranda.com, 833-PET-TEST, or via ClueJay.com online chat.

Fecal Ova & Parasites by Microscopy

NONE SEEN	Good news! No eggs or parasites were found in the stool sample.
1	1 egg or parasite was seen
1+	2 to 4 eggs or parasites were seen
2+	5 to 10 eggs or parasites were seen
3+	11 to 50 eggs or parasites were seen
4+	>50 eggs or parasites were seen

If Detected

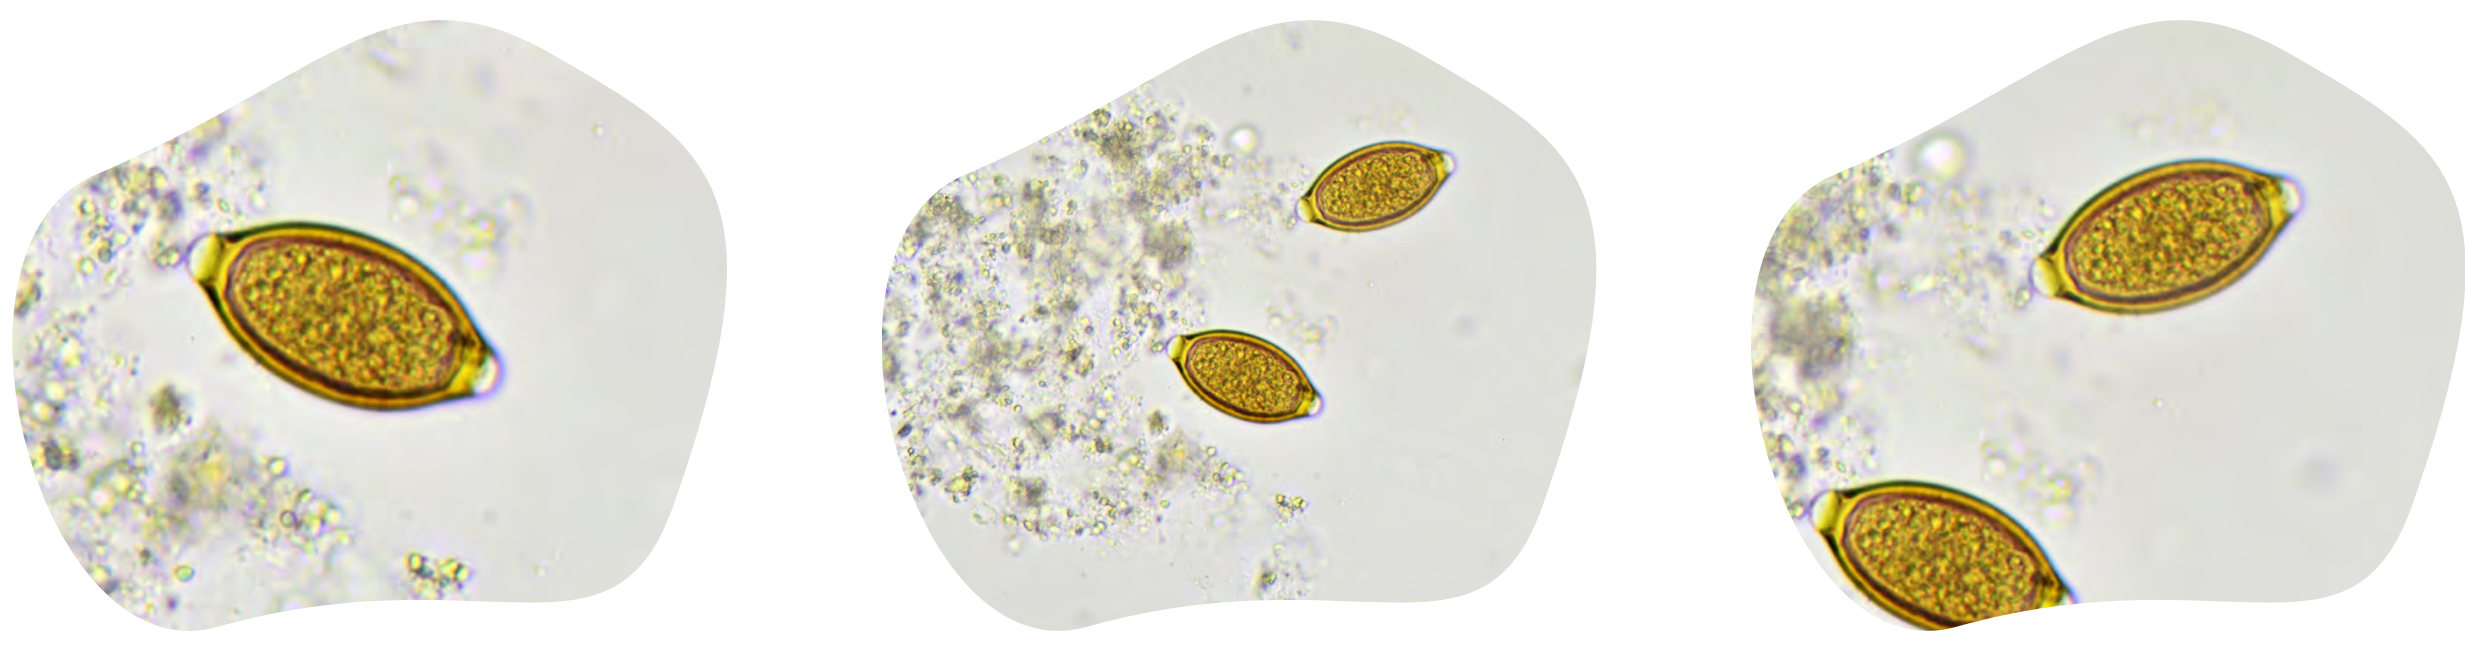

Deworming treatment is likely needed right away even if the numbers detected were low (1 or 1+). Even low numbers can indicate a harmful infection.

Roundworms NONE SEEN ✓

Hookworms NONE SEEN ✓

Tapeworms NONE SEEN ✓

Whipworms 3+ (11 TO 50 EGGS OR PARASITES WERE SEEN) ⚠

Coccidia NONE SEEN ✓

Lab Notes:

Please contact a local or virtual (online) veterinarian for any test result questions or treatment advice.
