

Dog & Cat Worms

Do You Know What To Look For?

Common Signs:

- Excessive gas
- Blood in stool
- Diarrhea
- Dark stool (black or tar-like)
- Mucus on or around stool
- Straining or constipation
- Stool accidents
- Passing stool more often
- "Rice" or "spaghetti" in stool

Less Common Signs:

- Coughing
- Vomiting
- Low energy
- Weight loss
- Dull coat
- Change in appetite
- Pot-bellied appearance
- Licking, biting under tail
- Itching and signs of skin irritations
- Rubbing bottom on ground (scoting)

Many Pets Do NOT Show Any Signs At All

Stool Test From Home; No Vet Visit Needed

Test 2x/year for dogs & cats, 4x/year for puppies & kittens, and anytime you see abnormal stools.

Test now BEFORE worms harm your pet and your family.
